

Mirtec Signage Collection

Mirtec's Signage Solutions and Advanced Customized Systems

Mirtec is a manufacturer of sign systems based on aluminum extrusions for the way finding field.

We offer comprehensive architectural signage and way finding solutions and have some of the world's most advanced and innovative signage systems.

We are unique by offering you customized systems tailored specifically to suit your needs and achieve your vision.

Our customized systems fulfill every architectural design and function including wall-mounted signs, directories, desktop, projecting, overhead signs, free standing, post pylons and much more. Our modular sign systems encompass all requirements for interior and exterior identification, as well as adhering to American regulations and ADA Standards.

Mirtec believes that every goal is achievable, and does everything in its power to achieve anything and everything a client desires or envisions. That is why we offer endless design possibilities and have the best distributors located throughout the US and Canada offering you one-on-one customer service.

PANEL SIGN SYSTEM

Mirtec's Panel system features a unique solid aluminum extrusion frame with clean modern lines and a floating look.

Versatility is its greatest advantage-with a window for changeable messages, names, or directions.

The sustainability of this system makes it vandal-proof and an ideal solution for all building environments.

SUSTAINABLE DESIGN

REFLECTION

SIGN SYSTEM

Mirtec's reflection system is elegant and chic creating a clear crystal effect.

This system reflects current architectural trends, with its highly polished edges and frameless design.

A crystal clear elegant look is created with this system's frameless sides that expose its highly polished acrylic panel edges, thus reflecting color, light and interior surroundings.

This system can be integrated into any of our other flat-faced systems and will complement any interior environment with modern elegance.

FRAMELESS ELEGANCE

FASCIA

SIGN SYSTEM

This patented free style system is champion of the visual message and leader in freedom of design.

Fascia's Mondrian-like concept features modular panels in various horizontal and vertical configurations and in different sizes and colors.

The ability to combine customizable and standard signage, the modularity of the Fascia system allows for freedom of design with great ease.

SLEEK AND MODERN

JUPITER SIGN SYSTEM

Mirtec's Jupiter system is an ideal solution for distinctive signage with curved technology.

This system's sustainable design is built with recyclable aluminum and allows you to update any message inserts as needed without replacing the sign itself.
